

Republic of Seychelles

Estimated population 85000

With a GPD per capita running close of \$8,000, Seychellois are extremely rich by African standards. This is reflected in the country's rating as 47th in the world in the UN's Human Development index. A small, and therefore highly manageable economy, as well as a very highly developed tourism industry has helped created a positive economic situation in which inflation was kept to a mere 1% in 2004. Life expectancy for females is 77 years and for males it is 66.
